

Aluminum Chambered Boats

30-Foot Extreme Sport Fisherman

Goodbye, fuel dock!” This trailerable, tough-as-nails, offshore Extreme Sport Fisherman begs for foul weather to demonstrate its incredible seaworthiness, maneuverability, shock-mitigating ride and superior fuel efficiency. Its lightweight, patented, chambered hull incorporates a reverse chine, allowing the vessel to ride on top of the water with less drag than a typical boat. This means you get to the fish a whole lot faster using less horsepower. Considering today’s gas prices, we suspect you won’t miss the fuel dock.

“We’ve saved \$10,000 per summer since we bought our ACBs. We average a 33-knot cruise and save 25 gallons of gas per boat, per day and get there 30 percent faster. The faster we go in rough water, the better the boat performs.”

— Ron Moyer, Owner, Beacon Hill Lodge, Ketchikan, Alaska

Aluminum Chambered Boats is a small but internationally renowned boat manufacturer whose ingenuity and reputation is built on delivering safe boats designed for extreme conditions. ACB incorporates the same stringent construction and safety requirements in its line of fishing and cruising boats as it uses in its commercial and military vessels. The chambered hull design is a modified V-hull with contiguous

airtight aluminum chambers that provide critical survivability flotation. The unique chambered flotation system cannot be compromised — hit a log; tear the hull; stay afloat; stay alive! These are the first and only aluminum boats tank-tested by the U.S. Coast Guard and approved without using foam flotation.

Built to last a lifetime, ACB’s aluminum hull and deck are more durable than fiberglass and require much less maintenance. No cracks. No chips. No wood. No

Specifications

LOA	33 ft. 8 in. (w/o motors)
BEAM	8 ft. 6 in. (exterior) 6 ft. (interior)
DRAFT	18-20 in.
WEIGHT	9,000 lb. (avg. wet)
FUEL	150 gal.
OPTIONAL FUEL TANK	49 gal./80 gal.
MAX. POWER	600 hp
HULL THICKNESS	¼-in.
AFT DECK	6 ft. x 10 ft. 5 in.
MAX. WEIGHT	4,450 lb.
CABIN LENGTH	10 ft. 3 in.

NOTABLE FEATURES

- Minimum of eight individual, airtight, pressure-tested, ⅜-inch-thick sealed aluminum chambers
- Hull and decks are built using ¼-inch-thick marine-grade aluminum alloys that pass stringent industry manufacturing standards
- Beaching plate is ¼-inch aluminum
- Trailerable

foam. No buffing. No polishing. And if your children’s children’s children manage to wear it out, it’s recyclable.

ACB’s comfortable interiors vary based on boat size, style and customer preference. V-berth, dinette, galley, head, heating, A/C, flybridge, inboard, outboard and jet propulsion represent just some of the configurations available.

A factory-direct company with new and used demos for sale, ACB — headquartered in Bellingham, Washington — builds NMMA-certified, high-performance aluminum boats ranging in length from 26 to 41 feet for recreational, government and commercial customers on a global basis and holds a variety of patents on its unique designs.
