

Accurate Fishing B2-197 2-Speed Reel

Accurate's new B2-197 2-Speed offers all the attributes of a true workhorse in miniature size. This 20-ounce two-speed easily tackles school-size tunas that power straight down like their big brothers. The high-speed, 6-to-1 gear ratio helps you pick up line when that fish makes a suicide run at the boat; the low-speed 3-to-1 gear stops them dead in their tracks on that blistering first run to the depths.

Just like Accurate's other Boss two-speeds, the B2-197 features 6061 T-6 aircraft-grade aluminum construction, Accurate's patented TwinDrag System for smooth, powerful performance, AccuCast Cast Control System for better accuracy and fewer backlashes and heat-treated stainless-steel gears for the ultimate in cranking power.

Accurate's TwinDrag system applies drag pressure to both sides of the reel spool. Because of that, the reel better dissipates

heat, allowing the reel's braking assembly to operate much more efficiently. Anglers can exert maximum pressure on a streaking fish while maintaining an extraordinarily smooth and consistent drag load.

A smoothly operating drag also eliminates the jerky line release that can tear

hooks out of fish and break lines. The constant, unrelenting drag pressure more quickly tires the fish. Drag smoothness is especially critical when fishing for large, powerful fish or when using smaller, light-weight fishing lines.

Accurate's AccuCast Cast Control System was designed to prevent backlashes. The wide range of settings allows anglers to cast with or without applying thumb pressure. The system also enables anglers to precisely set the amount of trolling drag for slow-trolling live baits while maintaining a strike-drag setting.

Other key features of the B2-197 include two stainless-steel anti-reverse bearings, heat-treated pinion gears, unhindered free-spool and seven ABEC-rated stainless-steel bearings sealed with Teflon impregnation for added corrosion resistance.

The B2-197 holds 300 yards of 15-pound mono or 400 yards of 40-pound Spectra.

Accurate reels, no matter what the size, are all built to withstand the abuse of a saltwater environment. They were created to handle the long haul, whether that's a grueling battle with a worthy finned opponent or a 16-day boat ride down to the fishing grounds.

We love to fish and strive to create products that help anglers create lifetime memories.

Specifications

WEIGHT	20 oz.
GEAR RATIOS	6-to-1 (high) 3-to-1 (low)
LINE CAPACITY	300 yd./15-pound (mono) 400 yd./40-pound (braid)

NOTABLE FEATURES

- Patented TwinDrag™ System
- Seven Class-5 ABEC stainless-steel bearings
- Two stainless-steel anti-reverse bearings
- Titanium friction washers
- Stainless-steel gears
- AccuDrag system
- Boss reel bag
- One-year warranty
- Proudly designed, manufactured and assembled in the USA

Fish Hard.
